

How to Read a Montana Adult-Use Marijuana Flower Label

All regulated marijuana and marijuana products (adult-use and medical) must be tested in their final form and correctly labeled prior to being sold to a consumer at a retail location. The Department has created this document to assist consumers in making informed purchasing decisions.

Quality Assurance Information:
All products include a QR code that, when scanned, links to their related **Certificate of Analysis, or COA**.

The COA provides the marijuana testing laboratory's results, which include the product's **contaminant testing, potency, cannabinoid profile, etc.**

The required **universal marijuana symbol**. This symbol is required on all regulated Montana marijuana products:

MARIJUANA

The date that the marijuana flower was **harvested**.

Sour Diesel:
The name of the Marijuana Flower Strain.

Net/Net Weight:
The weight of the actual product (minus packaging).

XYZ Cannabis Co.
Harvested: XX/XX/XX

Sour Diesel Net: X oz. (X g)

Total THC: X% THC: X%
THCa: X% CBD: X%
CBDa: X%

WARNING: xxx

Potency:
Marijuana products differ in their potency. This means they have different amounts of cannabinoids, like **THC, THCa, CBD & CBDa**. Cannabinoids affect people differently.
***Adult-use marijuana is capped at 35% Total THC.**

Each product includes the following **required verbatim statements**:
-Keep out of reach of children and pets.
-This product may be addictive.
-This product may have intoxicating effects. Do not drive while under the influence of marijuana.
